DTE_x Fire Fighting Series

Bone Conductive audio accessories

Entel's comprehensive understanding of the demands of front line Fire Fighting has enabled us to develop a range of market leading radios & accessories. Specifically designed with professional Fire & Rescue applications in mind and with a global customer base, Entel's Fireground radio equipment is already used by many of the world's leading Fire & Rescue organisations.

Our Bone Conductive accessories have been designed to withstand the everyday rigours of the Fireground environment and can easily be worn in conjunction with your existing breathing apparatus (BA) & helmet.

Entel offer two accessories with advanced bone conduction technology:

Throat mic

Skull mic

Both models interface to Entel's quick release submersible PTT

Skull mic

CXR5

The CXR5 incorporates a high performance, low profile, bone conductive skull microphone that provides clear audio transmission even in the noisiest of environments. Unlike conventional headsets, the bone conductive skull mic is not adversely affected by external sounds. The incorporated high quality earpiece ensures loud and clear reception.

The fully adjustable Skull Mic mounts into most helmet types and attaches to a Submersible PTT via a quick release Nexus connector. The PTT has been designed to clip on to a belt or any other suitable position using its rugged revolving clip. The large size PTT switch is easy to use even with a gloved hand or under clothing.

Features:

- ✓ High performance bone conductive skull mic
- ✓ Unique fastening-strap system fits all BA & helmet designs
- ✓ IP54 robust durable design
- ✓ Supplied with Submersible quick release PTT unit
- ✓ ATEX Approved

Throat mic

CXR16

The CXR16 incorporates a high performance bone conductive throat vibration microphone that provides clear audio transmission even in the noisiest of environments. Unlike conventional headsets, the bone conductive throat mic is not adversely affected by external sounds.

The bone conductive microphone is placed on the neck close to the throat and fastened with a soft Velcro band, the audio is routed to a soft 'D' shape earpiece. The CXR16 connects to a large rugged Submersible PTT via a robust cable and quick release Nexus connector. The PTT has been designed to clip on to a belt or any other suitable position using its rugged revolving clip. The large sized PTT Switch is easy to use, even with a gloved hand or under clothing.

Features:

- ✓ High performance bone conductive throat mic
- ✓ Can be used under protective suits
- ✓ Soft-feel washable neck band
- ✓ IP54 robust durable design
- ✓ Supplied with Submersible quick release PTT unit
- ✓ ATEX Approved

The industrial grade DTE_x Fire Fighter Series is designed and approved to meet the latest MED standard implementation regulation MED/5.20 and European ATEX directive.
